**MARCH 19, 2024 MEETING ANNOUNCEMENT, 2023 END OF YEAR UPDATE, AND NWRA CONFERENCE REMINDER**

NDWR staff have been reviewing presentations and recordings from the series of meetings held on August 1, September 6, and September 26, 2023, and are compiling the key points and ideas for further analysis and consideration. Staff have also been reviewing the reports documenting the groundwater flow models for the upper, middle, and lower Humboldt regions. *Evaluation of Stream Capture Related to Groundwater Pumping, Upper Humboldt River Basin, Nevada* (Carroll et al. 2023) has been published as Bulletin 49 and *Groundwater Discharge from Phreatophyte Vegetation, Humboldt River Basin, Nevada* (Huntington et al. 2022) has been published as Bulletin 48, both of which are available on the NDWR website. The remaining model reports are still in review and will be similarly published when they are released.

The next meeting to update stakeholders on our analysis and ideas we believe can be implemented in the near term, longer term, and those that will require legislative action to move forward will be held at 1:00 pm on March 19, 2024, at the NDWR office and via Microsoft Teams. The information required to join the meeting remotely can be found below.

In the meantime, we encourage all interested stakeholders to attend the Nevada Water Resources Association 2024 Annual Conference in Las Vegas, Nevada January 30 to February 1, 2024. There will be several technical sessions discussing conjunctive management directly, others discussing concepts related to conjunctive management, and many other water-related topics. More information, including the conference week program, can be found at [www.nvwra.org](http://www.nvwra.org).

We appreciate the efforts of everyone who contributed their time, thoughts, and ideas so far in this process. If you have questions regarding this announcement or need assistance or accommodation, please contact Levi Kryder at 775-684-2866 or [lkryder@water.nv.gov](mailto:lkryder@water.nv.gov).
